

HARIOM KUMAR GUPTA

Full-Stack Developer (MERN, Next.js, NestJS) | Open to SDE & Full-Stack Roles

Email: hari.9506563662@gmail.com • Location: Lucknow, UP, India • GitHub: github.com/Omkumar9506 • LinkedIn: linkedin.com/in/omkumar9506 • LeetCode: leetcode.com/omkumar95065 (320+ Solved in Java)

PROFESSIONAL SUMMARY

Full-Stack Developer with deep experience in building real-time WebRTC applications and payment-integrated platforms. Engineered production-grade systems featuring PostgreSQL, NestJS, Next.js, and Razorpay with robust Role-Based Access Control (RBAC). Strong foundation in REST API design, JWT authentication, and relational schema modeling. Passionate problem solver with **320+ LeetCode problems solved in Java** covering Data Structures & Algorithms.

TECHNICAL SKILLS

Languages:	Java, JavaScript (ES6+), TypeScript, C++, Python
Frontend:	React.js, Next.js (App Router), Redux Toolkit, Context API, Tailwind CSS, Bootstrap
Backend:	Node.js, Express.js, NestJS, Spring Boot, REST APIs, WebRTC, Socket.io, WebSockets
Auth & Security:	JWT, Bcrypt, Role-Based Access Control (RBAC)
Databases:	MongoDB, Mongoose, PostgreSQL, MySQL, TypeORM
Tools & Platforms:	Razorpay, Cloudinary, Git, GitHub, Postman, Hoppscotch, Vite, Webpack
Core CS:	Data Structures & Algorithms, DBMS, Operating Systems, System Design

FEATURED PROJECTS

SkillShare: Full Stack Learning Platform | *Next.js, NestJS, PostgreSQL, TypeORM, Razorpay*

GitHub / Live

- Architected multi-role RBAC architecture (Student, Instructor, Admin) with NestJS guards and secure JWT session management.
- Built complete course lifecycle: enrollment flow, video progression tracking, quiz modules, and automated PDF certificate generation.
- Integrated Razorpay payment gateway with webhook verification for idempotent order fulfillment, and Cloudinary for media assets.
- Engineered 25+ RESTful APIs across 6 normalized relational entities with optimized PostgreSQL query indexing.

EduMeet: Live Video and Chat Learning Platform | *React, Node.js, Express, WebRTC, Socket.io, JWT*

GitHub / Live

- Developed peer-to-peer real-time video communication supporting 50+ concurrent users with sub-second chat latency via WebRTC and Socket.io.
- Enforced role-based meeting controls (Host vs. Student) via custom Express middleware, protecting room access and media signaling.
- Designed MongoDB schemas and 10+ REST endpoints handling meeting persistence, attendee verification, and real-time session logs.

Library Management System | *React, Node.js, Express, MongoDB, JWT, Bcrypt.js*

GitHub / Live

- Built end-to-end library operation portal with dual authorization tiers (Admin/Student) and Bcrypt salted password security.
- Implemented automated fine calculation engine and issue/return ledger, cutting manual inventory tracking overhead by 70%.
- Designed modern responsive React interface with real-time book status lookups and RESTful backend on MongoDB.

EDUCATION & CERTIFICATIONS

Dr. A.P.J. Abdul Kalam Technical University (AKTU), Lucknow

Expected 2027

Bachelor of Technology (B.Tech) in Information Technology — Aggregate: **72.56%**

Lucknow, UP

Complete React and Next.js Developer Course — Udemy

2025

Hands-on mastery of React 18/19, Next.js App Router, Server Components, SSR/SSG, and State Architecture.

Certified
